Bad Camberg, November 2020

REACH – Declaration (not valid for absolute shaft encoders ROTARCOD)

Our company is a manufacturer of electronic products, in terms of REACH a so-called "downstream user". We exclusively manufacture non-chemical products (items) and use market conform components for production.

Additionally, the products should not emit any substances if used under normal conditions or conditions that are reasonably predictable. Therefore, our company is in principle not subject to a registration obligation nor are we bound to produce Safety Data Sheets.

Additionally, we will inform you immediately according to REACH - Article 33, if our products contain substances (provided the content is at least > 0.1 %) that are classified by the European Chemical Agency (ECHA) as particularly alarming. According to the data at hand, we do not assume that this will be the case.

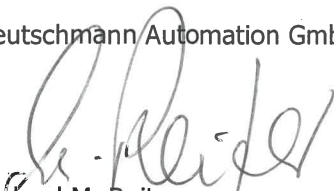

We assume that the suppliers do not supply us with substances in accordance with Annex 17.

In order to ensure our customers a continuous supply of reliable and safe products, we ensure that our suppliers meet alle requirements with regard to chemical substances and materials, and therefore no substances from the candidate list of substances of concern (SVHC) for the manufacture of our products be used. (<http://echa.europa.eu/candidate-list-table>)

Completely independent of this declaration (and in our own interest as well as to ensure a high product security) we do ensure that our supplies compliance fully with REACH.

We maintain close coordination with our suppliers of chemical substances and mixtures (e.g. raw material, auxiliary material and consumables for manufacturing, treatment and processing of products or applications in other operational processes) and will make the preregistration of the products and/or later registration of the relevant REACH substances a part of our requirement for suppliers.
